PROFESSIONAL SUMMARY

Results-driven ICT Desktop Support Specialist with 3+ years of hands-on experience diagnosing and resolving complex hardware, software, and network issues across multi-user environments. Demonstrated expertise in configuring and maintaining IT infrastructure — including VPN, remote desktop services, and server environments — while keeping 55+ end users productive and secure. Holds a Diploma in ICT (Applications Development, NQF Level 6) backed by six industry certifications from Cisco Networking Academy and Samsung, spanning cybersecurity, networking, Python, data science, AI, and ethical hacking. Passionate about leveraging emerging technologies to drive operational efficiency and deliver world-class technical support.

PROFESSIONAL GOAL

To secure a challenging ICT Desktop Support, Systems Administrator, or Technical Support Engineer role within a forward-thinking organisation where I can apply my technical expertise and continuously grow. My aim is to progress into network engineering and cybersecurity, leveraging my Cisco certifications and Python skills to contribute to secure, resilient IT infrastructure — while mentoring peers and championing best practices in end-user support.

TECHNICAL SKILLS

Desktop Support	Hardware diagnostics & repair, OS installation & configuration, driver management, peripheral setup, first-call resolution
Networking	VPN configuration, Remote Desktop (RDP)
Systems & Servers	Pastel Server administration, Windows Server environments
Software & Tools	Microsoft 365 (Word, Excel, Outlook, Teams), remote support tools
Programming	Python (Cisco Essentials I + Samsung AI/ML programme) Coding
Cybersecurity	Ethical hacking methodology, cybersecurity principles, threat awareness, data protection & compliance
Data & AI	Data science fundamentals, AI & Machine Learning concepts (Samsung programme), data capturing & verification
Soft Skills	End-user training, clear technical communication, high-volume workload management, smart escalation, fast learner

WORK EXPERIENCE

IT Technical Support Specialist

Apr 2023 – Apr 2026

Siyakholwa Development Foundation · East London

- Provided comprehensive end-to-end technical support for 55+ users, consistently achieving first-call resolution on hardware and software issues to maintain maximum system uptime.

- Managed and maintained full IT infrastructure — servers, workstations, switches, and peripherals — ensuring system security, stability, and seamless network connectivity.
- Configured, administered, and troubleshooted VPN connections, remote desktop services (RDP), and the Pastel Server accounting environment for distributed staff.
- Deployed, updated, and troubleshooted software applications across the organisation, minimising downtime and enforcing software licensing compliance.
- Designed and delivered end-user training programmes on IT best practices, Microsoft 365 productivity tools, and cybersecurity awareness — measurably improving team efficiency.
- Provided off-site technical support to community members and external stakeholders, resolving technical and administrative queries with professionalism.
- Administered, scanned, and digitally archived documentation to meet storage and regulatory compliance requirements.
- Maintained accurate service records, authored incident reports, and escalated complex issues to senior engineers when required.

ICT Academic Support Facilitator

Mar 2024 – Sep 2024

Walter Sisulu University · East London

- Facilitated structured ICT support sessions, guiding students through technical coursework, software tools, and system-related challenges.
- Captured, verified, and managed student data across multiple academic platforms, ensuring accuracy and compliance with institutional requirements.
- Maintained detailed records and contributed to reporting and performance tracking across high-volume academic cycles.
- Honed communication and problem-solving skills in a demanding, deadline-driven environment supporting both students and academic staff.

EDUCATION

Diploma: Information & Communication Technology (Applications Development)

2021 – 2023

Walter Sisulu University

NQF Level 6 · Focus: Software Development, Networking, Database Systems, Systems Analysis

Media Consultant Certification

2013 – 2015

Boston City Campus

National Senior Certificate (Matric)

2012

Barkly East High School

CERTIFICATIONS & INDUSTRY TRAINING

Python, Artificial Intelligence & Machine Learning

Samsung Innovative Campus Programme · 2023 – 2024

Introduction to Cybersecurity

Cisco Networking Academy

Network Support & Security

Cisco Networking Academy

Python Essentials I

Cisco Networking Academy

Introduction to Data Science

Cisco Networking Academy

Ethical Hacking

Cisco Networking Academy

KEY ACHIEVEMENTS

- Sole IT support resource for 55+ users at Siyakholwa Development Foundation, maintaining high system availability over a 3-year tenure.
- Successfully configured and managed remote desktop and VPN infrastructure, enabling seamless hybrid work capabilities.
- Completed 6 Cisco Networking Academy certifications alongside a Samsung AI/ML programme, demonstrating commitment to continuous technical development.
- Designed and delivered staff IT training initiatives that significantly improved productivity and security awareness organisation-wide.
